DESIGNERS and floor-covering manufacturers are finding new ways to use old, reliable materials like vinyl, canvas and cork to add durability (and style). Washable floor materials with bold graphics, strong textures and bright colors hold up well in all seasons, especially summertime, when sandy feet and muddy paws abuse surfaces under foot.

Hurricane lanterns with bell-shaped glass globes from Coldwater Creek set a nostalgic mood. The powder-coated iron frame has a spiked plate to accommodate different sizes of pillar candles; a hinged handle allows for hanging or carrying to light the way. In two sizes, 8" x 14 inches (\$30) and 9 by 17 inches (\$40); 800-968-0984 or www.coldwatercreek.com.

Taking It to the Mat

Made from the same woven vinyl-coated polyester material used on lawn furniture, the rugMat collection from Clewisch has the good looks of sisal with all the durability and easy care of polyurethane. At home—in an enclosed porch or on a covered patio (to avoid slippage when wet), these mats are available as rugs in 2-by-1-, 4-by-4-, and 4-by-6-foot sizes, and as runners in 2-by-6 and 2-by-9 feet. With some high-color fleeceds and six more muted colors, including plaid and stripes, in aubergine, straw, bronze, and bark, there's one to suit any setting. A nontoxic backing keeps the rug from sliding. Call for a free color catalog: 800-441-4444, ext. 444-7794.

Now You're Cookin'

For an outdoor cooking experience that's as good as the food, you need a grill that's built to last. The new 30-inch, 4-burner gas grill from the 2001 Weber® collection is a perfect example. It's made of heavy-duty stainless steel and features a large, easy-to-use control panel. The grill is also equipped with a side burner for warming food or melting butter. And, of course, it has a built-in thermometer to help you keep track of the temperature. The grill is available in two colors: stainless steel and black. Call for more information: 800-451-9299 or www.weber.com.

Resilient flooring—durable, forgiving, easy to install and maintain—has long been lauded for its practicality, but not always for its looks. Indeed, it's been called the flooring industry's equivalent of orthopedic shoes: easy on the feet, if not on the eyes. "A lot of people associate it with the drab, gray stuff that covered up their hardwood floors," says *TOH* show host Steve Thomas. These days, they'd be wrong. From venerable linoleum to top-selling vinyl to vanguard versions of cork, rubber, and leather, today's "soft" flooring comes in an amazing array of colors, patterns, and sizes. Yet these newer resilient flooring materials remain as affordable, simple to care for, robust, and useful as their hardy forerunners—they just look a whole lot better doing it.

vinyl

With the most choices of any resilient product, vinyl is the most widely applied flooring material. It's also the most forgiving, with a wide range of colors, patterns, and textures. It's also the most affordable, with prices starting as low as \$1.00 per square foot.
